

Internship Brief  
Gina Peng  
ART 293  
Spring 2018

Total Hours Worked:  
150

Instructor:  
Ailed Garcia

Company:  
One Wave Designs

Supervisor:  
Paul Coffman

## Reflection

In Spring 2018, I interned at One Wave Designs in Kapahulu. One Wave Designs is a small business in Honolulu that specializes in building custom and responsive websites.

My supervisor was Paul Coffman, the founder of One Wave Designs.

I enjoyed learning about the DNN software and using it to build websites because it was something that I had never done before. Finally, I would recommend this internship to people who are interested in web developing.

# Strengths & Weaknesses

My strength is to be willing to learn new software and weakness is to be lacking in web development.

## Work

The work that I did consist mostly of web developing. Projects that I have done are coding content for various websites such as Elite Health Hawaii, Hawai'i State Teachers' Association, A & K Landscaping, Ultimate Innovations, Engineering Partners, and Top Limousine Hawaii.

I felt I could have done better in coding some of the content on the websites because I was struggling with it.

## Aesthetics

**Our Philosophy On Aesthetics**

Aesthetic medicine is fun and enjoyable. Elite Health will provide the most effective therapy in a comfortable, relaxing environment. Our main concern is providing the best results and your overall satisfaction.

**Services**

Our treatments range from injections (Botox®, Dysport®, and Xeomin®) to fillers, Vampire facelifts to Microneedling we've got a variety of treatments to help you look younger.

Elite Health Hawaii is also the very first clinic in Hawaii to offer the quickest, safest, most effective and least painful way to eradicate Spider Veins from your face.

Dysport	<b>Pricing</b>
Restylane Lyft	\$400 per treatment of the full face
Restylane Refyne	<b>Thermavein</b>
Restylane Silk	We are the very first clinic in Hawaii to offer the quickest, safest, most effective and least painful way to eradicate spider veins from your face. Many people do not know just how easy it is to get rid of facial spider veins so they just live with them or try to cover them up with makeup. Thermavein is a technology developed in Europe that has been used there for years and was only recently FDA approved for use in the United States. Thermavein utilizes radio frequency to eliminate spider veins from your face more effectively and less painfully than both laser and IPL. Thermavein can even be used to treat the spider veins at the base of the nostril. In most patients, only a single treatment is required.
MD Pen	Thermavein works by compressing the tiny veins so the walls of each side are touching then we apply radio frequency for 0.2 seconds to make the walls stick together and eliminate the vein.
Injections	<b>Asclera</b>
Dermal Fillers	We can smooth the appearance of moderate to severe frown lines between your eyebrows in just ten to twenty minutes. A single Dysport treatment is all it takes to improve the appearance of even severe frown lines, without the overdose "Hollywood look."
Microneedling and PRP (platelet rich plasma)	More than half of all patients see improvement in two to three days. Results last for four months, and 97 percent of patients say they would do it again.
Medical Grade Skin Care	For veins on the legs we may use a combination of Thermavein and a chemical solution or sclerolant. The sclerolant is injected into veins up to 3 mm and causes damage to the vessel walls causing them to collapse. Depending on the extent of the vessels, multiple treatments may be required to completely treat leg veins.
Spider Vein Treatments

## Women

**Age, Like Beauty, Is More Than Skin Deep.**

Women have special needs as they age. Your challenges tend to be more multifaceted than those of your male counterparts. Changes on the surface, such as dry skin or loss of elasticity, are actually the signs of processes that go much deeper. In your 40s and 50, as you approach menopause, changes in your hormones become increasingly significant.

**Don't Just Treat The Surface, Treat The Source.**

Our program of natural nutrition, nutritional supplementation, hormonal balancing, and exercise help reset your biological clock to prevent or dramatically slow age-related symptoms.

**Weight**

Weight gain can occur quickly and tends to occur in the abdomen as opposed to the hips.

**Sex**

Dry skin, loss of elasticity, and thin skin that cracks more easily are common.

**Sleep**

Poor sleep and irregular sleeping patterns can occur more frequently.

**Hot Flashes**

Hot flashes are a commonly associated symptom of the hormonal changes associated with female aging.

**Energy**

Decreased energy is a sign of aging that affects both men and women.

**Mood**

Irritability and anxiety, accompanied by mood changes, is not unusual.

**Libido**

Many women report a decreased libido, vaginal dryness, and painful intercourse.

**Memory**

Cognitive and memory problems reminiscent of the "brain fog" associated with pregnancy can become a persistent issue.

**Aches**

Aches, pains, and stiffness are all common and some of the most easily treated symptoms.

**Headaches**

Increasingly frequent urination is often reported and can become a concern.

**First We Measure, Then We Manage.**

Balancing hormones takes a lot of fine tuning and requires the help of experts. At Elite Health Hawaii will help you tackle the symptoms of aging and control menopause safely. We will develop a personal treatment plan for you using proactive strategies designed to help you look and feel your best, while keeping you at the lowest possible risk for diseases associated with aging.

Start Feeling Like You Did In Your 20's

# Engineering Partners

## CIVIL ENGINEERING

Our civil team provides complete civil engineering services for municipal, commercial, industrial and residential projects of various magnitudes.

## STRUCTURAL ENGINEERING

The Engineering Partners team has extensive experience in structural design and analysis for commercial, industrial, and single/multi-family residential projects of various magnitudes.

## MECHANICAL ENGINEERING

The Engineering Partners team specializes in a variety of mechanical engineering modalities for commercial, industrial, and single/multi-family residential projects of various magnitudes.

## ELECTRICAL ENGINEERING

Our electrical engineering team provides complete electrical services for municipal, commercial, industrial and residential projects of various magnitudes.

## LAND SURVEYING

Engineering Partners has extensive experience in field of land surveying. Our survey team provides complete survey services for municipal, commercial, industrial and residential projects of various magnitudes.

## CONSTRUCTION MANAGEMENT

Our construction management team provides complete administrative and management services for municipal, commercial, industrial and residential projects of various magnitudes.

### OUR APPROACH

We apply a holistic approach that is based on collaborative teamwork and a shared commitment to quality. We work closely with our clients and each another during each phase of a project, providing an integrated approach that delivers creative and cost-effective solutions.

[READ MORE](#)

### HISTORY

Engineering Partners was established in 2001 by engineers Nimr Tamimi and Yen Wen Fang in Hilo, Hawaii. Since that time, our company and team has grown in both size and stature. Today, we are a multi-office, multi-discipline engineering firm with the same local roots and expanded reach of services.
